Java Developer

Hiring organization
Omniscien Technologies

Employment Type
Full-time

Job Location
Thonglor/Wattana, Bangkok, Thailand

Asia Online *trading as* **Omniscien Technologies** / **Bangkok-Thonglor**

Asia Online is the research and development affiliate for Omniscien Technologies, building market leading artificial intelligence based language processing and machine translation technologies.

Due to significant growth in sales, we currently have an exciting opportunity for a Data Researcher. This position offers a competitive salary based upon the chosen candidate's experience, ability and achievement.

We are a market leading artificial intelligence and language technology company. We develop world-class machine translation, artificial intelligence, language processing technologies and services under the Language Studio™ and Media Studio™ brands. Our customers are located throughout the world and include governments and some of the world's leading companies. Our Bangkok office is the local affiliate of a multi-national company with a commercial presence in Thailand, Singapore, Europe and North America.

We are a friendly, energetic and talented group of young people who enjoy working with each other, and our work is exciting and challenging.

Description

As a Java Developer, you will be involved in the creation of software by designing, coding and testing world-class technology for our machine learning, machine translation and language processing systems as well as our artificial intelligence systems.

Responsibilities

• Develop Java applications and web user interfaces
• Work with a team of developers to write code in Java for the workflow and tools around machine translation, artificial intelligence and machine learning systems
• Create applications with a maintainable, secure and scalable code
• Constantly improve the quality and security of the product
• Learn new skills as needed
• Write and execute unit and integration tests where appropriate
• Analyze bugs and issues, debugging and bug resolution

Qualifications

- Thai native speaking and good English communication skills
- Bachelor's Degree or higher in Computer Science/Information Technology or related field
- Experience in software development and strong with Java programming language
- At least 1 or 2+ years of Java coding
- Knowledge and/or additional experience in Spring boot and Webservice, etc
- Experience with Docker and AWS is a plus
- Knowledge of database concepts and implementation (e.g. MySQL)

- Positive attitude and good teamwork
- Good problem analysis and troubleshooting skills
-
