## Junior Data Researcher

**Asia Online trading as Omniscien Technologies / Bangkok-Thonglor**

Asia Online is the research and development affiliate for Omniscien Technologies, building market leading artificial intelligence based language processing and machine translation technologies.

Due to significant growth in sales, we currently have an exciting opportunity for a Data Researcher. This position offers a competitive salary based upon the chosen candidate's experience, ability and achievement.

We are a market leading artificial intelligence and language technology company. We develop world-class machine translation, artificial intelligence, language processing technologies and services under the Language Studio™ and Media Studio™ brands. Our customers are located throughout the world and include governments and some of the world's leading companies. Our Bangkok office is the local affiliate of a multi-national company with a commercial presence in Thailand, Singapore, Europe and North America.

We are a friendly, energetic and talented group of young people who enjoy working with each other, and our work is exciting and challenging.

### Description

As a Junior Data Researcher, you will be part of our data processing team. You will use the Internet to locate, gather, collect and coordinate information for processing via automated tools. Data is at the heart of what we do. Although this is an entry-level role, the data processing team is an essential element of our success. Training will be provided for the selected candidate. This would be an ideal position for someone who is interested in getting a start this field. The role reports into the Data Production Manager.

### Responsibilities

- Working with other team members to identify, locate and submit data for processing.
- Execute data processing tasks in a timely and reliable fashion.
- Data research tasks to be completed as per target dates (and times) specified by your manager / lead in accordance with the instructions and specifications provided.
- Perform Quality Assurance of processed data / evaluate output as per given guidelines by your manager / lead.
- Initial training for the role will be provided.

Target Based incentives (*as agreed with your manager / lead*)

### Qualifications

- Thai national only (Male or female with age 18 and above)
- Basic IT experience

### Hiring organization

Omniscien Technologies

### Employment Type

Full-time

### Job Location

Bangkok, Thailand

- Can communicate (speak/write) in English.
