## NLP Internships available now! (Bangkok, Thailand)

### Description

Omniscien Technologies is a market-leading artificial intelligence and language technology company that develops and provides ground-breaking automated machine translation and language processing technologies, products and services under the Language Studio™ brand to a wide variety of customers throughout the world including governments and some of the world's leading companies and best known global brands.

We are currently looking for interns with NLP skills who can learn and apply their skills in an exciting and fast-moving, leading-edge environment!

### What we offer

We offer you an exciting and unique opportunity to join our team for the duration of this internship, learn from a team with leading-edge capabilities and work on a market-leading platform and workflow. This will give you insight into real-life challenges in a large language processing environment where language processing, machine translation, and machine learning converge.

We offer you the ability to join our R&D team in Bangkok, Thailand and also experience one of the most exciting countries in Southeast Asia.

### What we expect

We expect you to have a background in natural language processing (NLP) and good command of English, plus the willingness to work with our team in Bangkok.

### Hiring organization

Omniscien Technologies

### Employment Type

Intern

### Job Location

Bangkok, Thailand
